TG TECH GENI

Accelerating Digital Journey

AI-Powered Software Design and Development Solutions

Why Tech Geni Stands Out

WHY Choose Tech Geni?

We help companies build, scale, and modernize software - **faster, smarter, and more cost-effectively** — without compromising on quality, security, or transparency.

Tech Geni is a software services company with locations in **Germany and Pakistan**, combining **European business standards** with **high-performing engineering teams.**

Our mission is to enable companies to innovate faster through **modern software architectures, AI-powered development** and **reliable delivery models.**

Mature Onshore-Offshore Model
European standards, unified engineering team. Cost efficiency with clear accountability

End-to-End Processes
Seamless integration from start to finish.
Long-term focus with full accountability

Sustainable Value & Growth
Reliable, economical, and scalable solutions

Professionalism, People-Centered
Structured management, clear accountability
Empathetic communication

What We Build & How We Deliver

How can Tech Geni reliably build and scale my requirements — now and in the future?

Software Engineering

We design, build, and scale **secure, maintainable software for web and mobile** — from MVPs to enterprise platforms.

Core Competencies

- Custom Web & Mobile Applications
- API-First Architectures & Integration
- Legacy Modernization
- Performance Optimization

Core Technologies

- PHP, Node.js, Python, .NET
- React Native**,** React, Angular, Vue
- MySQL, PostgreSQL, MongoDB

Product Design & UX

We translate business requirements into intuitive, **user-centered digital products** that scale and evolve.

- Web & Mobile Product Design
- UX Research & User Testing
- Design Systems & Prototyping
- Developer-Ready Design Handoffs

Cloud & DevOps

We modernize and operate applications with cloud-native architectures and automated delivery pipelines.

- Cloud & DevOps
- Cloud Migration & Modernization
- CI/CD & Infrastructure Automation
- Cloud: AWS, Azure, Google, Hetzner
- Technologies: Docker, Kubernetes, Github Actions, GitLab Pipelines

AI-Accelerated Software Delivery

How does Tech Geni integrate AI to boost speed, quality, and consistency?

How We Use **AI**

AI is an engineering multiplier - not a replacement. We use:

- AI-powered agent-based programming and refactoring
- Intelligent code reviews and checks
- Faster onboarding through AI-powered agents
- Automated documentation and test generation

Security & Control

AI with human oversight — secure, governed, and compliant from the start.

- Human validation for all AI outputs
- Secure handling of source code and data
- Compliance with client and regulatory standards
- Controlled use of AI tools and models

Why This **Matters for** You

Faster, reliable delivery - without compromising on quality or trust.

- Faster time to market without sacrificing quality
- Predictable and consistent delivery
- Reduced technical debt and rework
- Scalable development without linear cost growth

Your Software, Your Choice – Fixed-Price, Dedicated, or On-Demand

Fixed-Price Projects
Predictable Delivery

- Architecture Consulting & Prototyping
- UI/UX Design
- Dedicated Project Manager
- End-to-End Software Development
- Premium Code Quality & On-Time Delivery

Dedicated Team
Your Development Partner

- Direct access to an exclusive development team
- Long-term collaboration for a smooth workflow
- More cost-effective than in-house hiring
- Seamless communication with all stakeholders

Outsourcing
Talent on Demand

- Instant access to specialized developers
- Scale team size as needed, no long-term commitment
- No termination costs, legal obligations, or staffing complexity
- Flexibly scale up or down to suit your needs

Solutions We've Built

Shaping the Future with Intelligent Technology Solutions

The digital transformation of companies and startups is our passion at Tech Geni. Our expert teams leverage innovative digital tools and develop tailored solutions for growth and success — for a better future with intelligent technology solutions.

Logistics

Healthcare

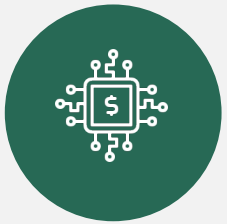

Real Estate

E-Commerce

Startups

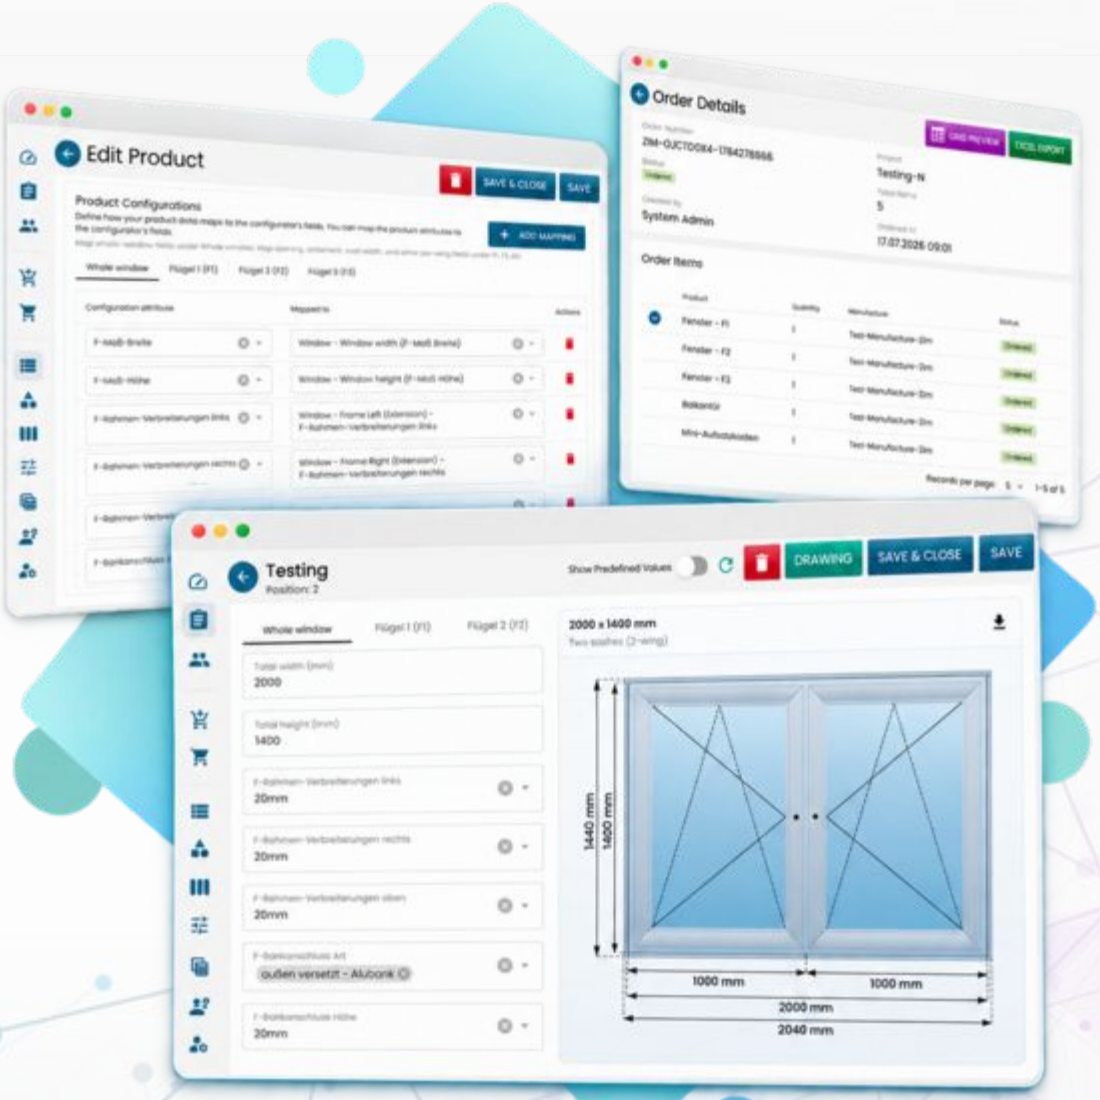

Case Study

Streamlining Window Sales and Manufacturer Ordering

A European window provider needed to replace spreadsheet-heavy workflows across product configuration, technical drawings, documents, and manufacturer ordering. TechGeni built a secure browser-based platform that captures product knowledge once and reuses it throughout the process - helping teams configure faster, reduce rework, and create consistent, manufacturer-ready output.

Case Study

Transforming Health Insurance Document Processing with Google Document AI

In the health insurance sector, precise and fast processing of various documents is of utmost importance. This case study examines the development for a health insurance company that struggled with a wide variety of document types. Using Google Document AI, Tech Geni developed a solution that not only streamlined document processing but also reduced costs and improved operational efficiency.

Case Study

Optimizing Logistics Operations: Transportation Management System

A leading player in the logistics industry faced the challenge of efficiently transporting products from its warehouses to end customers. With a large customer base and a complex network of warehouses, vehicles, and drivers, they sought a solution to optimize their delivery operations. This case study shows how Tech Geni helped by developing a custom transportation management system.

Case Study

Improving Patient Care: Data Management System

In healthcare, effective management and analysi of patient data are crucial for optimal care. Tech Geni supported a group of physicians in founding a startup to build a secure, user-friendly web-based solution for organizing and managing patient data. The goal was to give patients and physicians access to their medical history while ensuring data security and real-time analysis.

Transparent Pricing

Flexible engagement models with dedicated experts in **Pakistan and Germany.** Rates vary based on team size, contract duration and project scope. Volume discounts are available.

Engagements are also available as **fixed-price models** across multiple phases, once the scope is defined.

Engagement Level	Pakistan Region	Germany / Europe	Typical Responsibility
Senior Project Lead	$45 / hour	€90 / hour	Delivery Management, Customer Communication
Lead Solution Architect	$45 / hour	€90 / hour	Architecture, AI, Enterprise Integration
Senior Software Engineer	$40 / hour	€80 / hour	Backend, Frontend, Mobile Development
Senior UI/UX Designer	$35 / hour	€70 / hour	UX Research, Product Design
Software Engineer	$25 / hour	N/A	Development
QA Engineer	$20 / hour	N/A	Manual & Automation Testing

* Volume discounts available: 2–3 resources (5%), 4–7 resources (10%), 8+ resources – custom enterprise pricing.

Let's Work Together
